

DAMIÁN J. SÁNCHEZ

FRONT-END | FULL STACK DEVELOPER

SAP SD SR. CONSULTANT

PROFILE SUMMARY

I did my bachelor's Degree in System Engineering at UTN where i discovered the world of programming.

Currently, I'm Front-End developer and I'm learning and studying in CoderHouse/Platzi to be Full Stack Web Developer to improve my skills in the backend side.

Despite that I don't have a favorite language to work with, I'm keen to JavaScript, ReactJS and Node.js. However, I'm looking forward to new opportunities to learn exciting technologies.

TECHNICAL SKILLS - HIGHLIGHTS

Front-End:

- React JS, Redux toolkit
- JavaScript
- TypeScript
- CSS3
 - SASS, Styled Components, Tailwind
- Material UI, Bootstrap.
- Figma
- Git/Github

Databases:

- Firebase Cloud DB
- MySQL/MongoDB

WORK EXPERIENCE

Asap Consulting

Client: Bayer Crop Science

04-2020 - Present

Role: Frontend Web Developer

Design and create Webservices REST full API's or SOAP implementation against WEB platforms developed in JavaScript for Argentina, Paraguay and Brazil. I work for POD creating a React App for Service Fee, improving UI's to deliver a better experience to the user, giving them a feedback showing in what part of the process they were at this moment, and detailing the results of each jobs executed by an API from Backend. The UI allows them to schedule execution programs and set each user profile with variants of visualization.

Asap Consulting

Client: Monsanto company

08-2014 - 04-2020

Role: SAP SD Sr. Consultant

SAP restructuring of printing forms / printing programs / smartforms. Customization of new sales circuits. Post-production incidents regarding interfaces with legacy systems using SoapUI or Insomnia/Postman app, and JIRA. High knowledge of ABAP programming language, good level of debugging.

Accenture Tech Solutions

Client: YPF S.A

06-2010 - 2014

Role: Sr. Analyst SAP SD.

SAP SD Consultant Sr. Coordinator of the SAP SD / MM team at YPF S.A. Incident Management. Training for new team members. Optimization of own tasks and the work team. Analysis and design of new functional requirements. Develop and Debug in ABAP language. Reference of the Accenture team at YPF (leading around 10 resources).
